

Konfigurasi OSPF pada RouterOS versi 7

Konfigurasi ospf di Mikrotik-1:

```
/routing ospf instance add name=ospf-instance-1 version=2 router-id=main  
redistribute=connected,static,ospf
```

```
/routing ospf area add name=ospf-area-1 area-id=0.0.0.0 instance=ospf-instance-1
```

```
/routing ospf interface-template add network=192.168.0.0/30 area=ospf-area-1
```

```
/routing ospf interface-template add network=192.168.1.0/24 area=ospf-area-1
```

Konfigurasi ospf di Mikrotik-2:

```
/routing ospf instance add name=ospf-instance-1 version=2 router-id=main  
redistribute=connected,static,ospf
```

```
/routing ospf area add name=ospf-area-1 area-id=0.0.0.0 instance=ospf-instance-1
```

```
/routing ospf interface-template add network=192.168.0.0/30 area=ospf-area-1
```

```
/routing ospf interface-template add network=192.168.2.0/24 area=ospf-area-1
```
